

PETTS WOOD

CASE STUDY

Petts Wood, Kent.

In mid-2014, Concordia Construction Ltd were asked to bring their expertise to the picturesque village of Petts Wood in Kent, and install approximately 1000m² of WBS External Wall Insulation to the mixed retail/domestic block of flats adjacent to the town centre and railways station. Principal Contractor Keepmoat agreed with the Wetherby technical team that a 100mm insulation slab would be required to adequately reach required uValue requirements, with both white and tinted silicone "K" finish to provide an understated, yet striking façade finish.

With both internal and external refurbishment required, the interface of all trades on site was critical to the success of the programme, and Concordia maintained a flexible approach in order to best meet the needs of the client and ultimately deliver both a quality of service and a quality in finish that significantly enhances the appearance of Petts Wood town centre.
